OPEN HOUSE SINCE 30 YEARS – OVER 100 YEARS OF PRECISION AND INNOVATION IN PFRONTEN

With over 100 years of experience in mechanical engineering and a particular focus on 5-axis technology, the Pfronten site sets global standards in **precision and efficiency**. Our 5-axis machines are indispensable in numerous industries and have had a lasting impact on the manufacturing world for decades.

Discover our **world premieres**: For universal turning the **CTX 750** – now with 1250 turning length. For 5-axis milling, the new **DMX 60 & 80 U** as an entry into 5-sided machining, the 2nd generation of the **DMU 60 eVo**, for highly dynamic 5-axis simultaneous machining and the **ULTRASONIC 20 linear** which is the most precise 5-axis machine in its class.

For 24/7 production and increasing spindle running times, we will show you the complete **PH Cell** series for pallet handling from 300 up to 2,000 kg transfer weight as well as the **PH Cell Twin** for linking two machines. Our new and future-oriented **e-PALLET** system offers you almost unlimited possibilities for workpiece clamping, intuitive operation supported by the **Clamping Master**.

Visit us at this year's open house and find out how our **Machining Transformation Strategy can make your production more flexible, efficient and future-proof**. Together we develop customized solutions that will give you decisive competitive advantages. Register now at pfronten.dmgmori.com.

Your DMG MORI Team

MX - MACHINING TRANSFORMATION

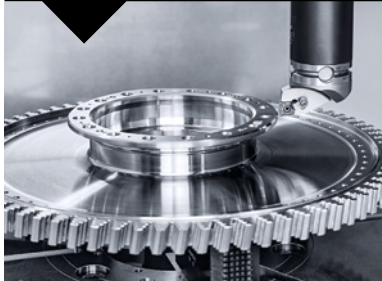

1

PROCESS INTEGRATION

REDUCTION OF THROUGHPUT TIMES FOR IMPROVED PRODUCT QUALITY AT THE SAME TIME

Do you need higher accuracy for your component?

→ Our solution: Integration of turning, milling and grinding processes in one machine tool live on the **DMC 125 FDS duoBLOCK** or the **CTX gamma 2000 TC**.

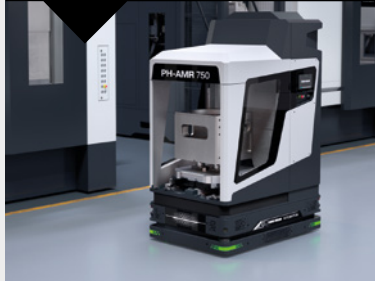

2

AUTOMATION

24/7 PRODUCTION AND MAXIMUM INCREASE IN SPINDLE RUNNING TIMES

Would you like unmanned production around the clock?

→ Use automation solutions such as the **Robo2Go Max** live at the CTX gamma 2000 TC or the **AMR** live at the DMC 85 H monoBLOCK.

3

DIGITAL TRANSFORMATION

PROCESS RELIABILITY THROUGH SENSOR-BASED SOLUTIONS

Do you want the perfect synergy of process integration and simple operation?

→ Visualize with **CELOS X widgets** technology cycles in parallel to the control system – and protect your machine optimally with the **MPC** (Machine Protection Control).

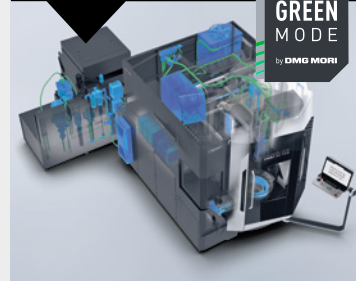

4

GREEN TRANSFORMATION

SUSTAINABLE PRODUCTION WITH REDUCED ENERGY CONSUMPTION

Do you want to significantly reduce your energy requirements in production?

→ Our measures for greater energy efficiency, such as the **adaptive coolant supply** for an energy-efficient machine, support you in this.
